

## What our partners and clients say about us...

### BESPOKE SOLUTIONS

As a manufacturer, we conducted dedicated market research into what features were most desired on a security product. We found that fit for purpose solutions triumphed, that way, whatever your security demand is, **ievo** has an option for you.

*"We needed a solution that would allow far greater control over our sub-contractor workforce. One of the fundamental goals was to have a biometric network that would allow us to monitor contractors regardless of the site they were working at. ievo Ltd allowed us to do this in a very short space of time."*

Tommy Occleshaw, Director  
OCL Facades

*"Our needs were very complex, however, we found a solution from ievo which answered all of our specific requirements. The installation has met our demands and it is outperforming all of our initial expectations."*

Martin Conley, IT Manager  
Allam Marine

*"Our school is very large, spread over several sites with multiple entry/exit points. This has always posed a significant access and security problem for us, with students, staff and visitors alike. The rapid installation of the ievo ultimate fingerprint readers has proved to be a tremendous success, immediately solving all of our access and security problems in one fell swoop."*

Nayland Southorn, Headteacher  
Emrys ap Iwan

### SIMPLE TO INSTALL - EASY TO USE

Utilising wiegand connections **ievo** products seamlessly integrate into leading access control systems. This ensures ease of installation with minimal disruption. Designed for simple use without compromising on quality or effectiveness, we find users adapt to our systems quickly.

*"ievo devices are easy to install, robust, operational in harsh climates and working conditions and surpass all our operational needs."*

Simon Orchard, Director of Security,  
Shetland Facilities Management

*"I use ievo alongside Paxton and it couldn't be simpler. It is a huge benefit to us as an installer, being able to quickly and effectively install, add and remove users. With ievo fully embedded into Paxton it massively reduces installation time, allowing me to allocate more time to new customers."*

Simon Farmer, Managing Director  
ACC Security

*"The ievo fingerprint recognition system avoided the need for fobs or cards. This was a major benefit to us because the ievo biometric seamlessly integrates, there is no need to replace traditional security that is already in place."*

David Howlett,  
Fine Ladies Bakery

### COMMITTED SUPPORT

At **ievo** we pride ourselves working alongside our partners and clients. With dedicated teams to help provide support whether it be sales, technical or marketing, we are happy to help.

*"The support of the ievo team has been outstanding. ... Nothing has been too much of a problem for ievo with a very quick turnaround of product enhancement."*

Kevin James, Managing Director  
Kevin James Ltd

*"Vistec Systems Ltd have dealt with ievo since 2009, during which time ievo have continually provided us with excellent products, sales support and after sales care. We have been delighted with the excellent design flair and professional, proactive approach to all enquiries; Shaun and his team at ievo should be congratulated on an extremely reliable and robust reader."*

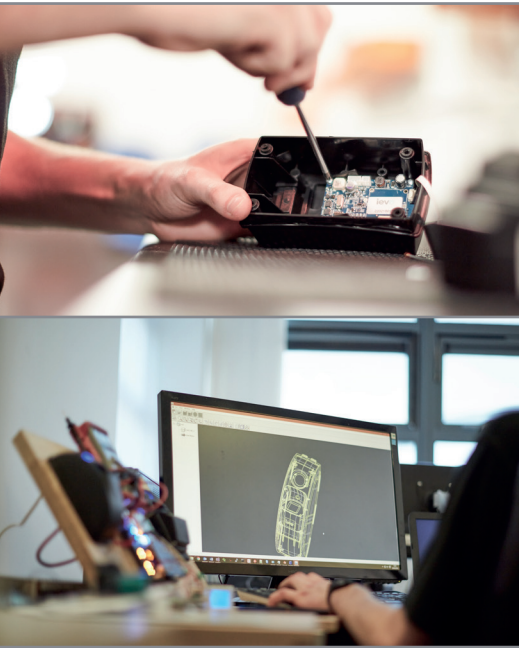

*"We at Vistec Systems can confidently recommend ievo as a solid manufacturer, who are true experts in their field!"*

Dean Hawkins, National Sales Director  
Vistec Systems Ltd

*"ievo Ltd have been great to work with from initial consultation and demonstration through to support of the live system."*

Graham Smith, Hospitality Technician  
Middlesbrough Football Club

# RELIABLE. BIOMETRIC. SOLUTIONS.

## UNPARALLELED TECHNOLOGY

Our advanced reader technology has the ability to identify users through levels of dirt, cream, liquid, and even in adverse weather conditions.

We have sourced the highest standard components that comprise both the **ievo** ultimate™ and **ievo** micro™ readers which provide both unparalleled internal and external security solutions.

*"Another benefit of the **ievo** reader is how it is unaffected by ambient light which meant we could place the readers exactly where our client wanted. This was great news as this has been a problem for us with previous biometric readers."*

Craig White, Technical Sales Manager  
Phoenix Eye

*"We were all amazed at how it worked even with cream on our hands. This was a major advantage to us because we work with so many different materials throughout the day and to finally be able to use them and not worry is great!"*

Paula Sharp, Project Manager  
Kids Allowed Nursery

## AESTHETICALLY PLEASING

We provide solutions that not only really work, they look great too!

Both **ievo** readers boast a user-friendly ergonomic design, ensuring that whatever environments they are installed in, they will fit in with their surroundings.

*"The new system is great and we are thrilled with the results. The readers look fantastic and the gym members have expressed positive feedback towards the transition. Using **ievo** biometrics eliminates non-members accessing the facilities by using members' cards. We are currently looking to implement **ievo** in more of our gyms in the near future!"*

Gordon Hall, Managing Director  
Lifestyle Fitness Clubs

*"I have never seen access like this before, I love it. It is much easier as I never have to worry about remembering my membership card. The whole system itself looks very high tech, it's very impressive looking."*

Gym Member  
Darlington Lifestyle Fitness
